

This map divides the world into five solar performance regions based on yearly averages of daily hours of sunlight and ambient temperature. Each specific site will, of course, be different. Also, local weather conditions and seasonal changes can significantly affect the amount of sunlight available. Look on the map to find your location and select Zone 2 or Zone 4

Z4 = 4.0-4.9, 5.0-5.9, 6.0-6.9 Hours of Daily Solar Radiation.
Z2 = 1.0-1.9, 2.0-2.9, 3.0-3.9 Hours of Daily Solar Radiation.
